johnreign.bajao@gmail.com ❖ (+63) 955-977-1627 ❖ Muntinlupa City, Philippines, 1772

CAREER OBJECTIVE

Results-driven Implementation and Support Specialist with 5+ years of experience in SaaS implementation, workflow automation, SQL reporting, API integrations, and technical support. Experienced in configuring enterprise applications, troubleshooting complex issues, supporting deployments, and collaborating with global cross-functional teams. Strong background in implementation delivery, workflow optimization, customer support, and translating business requirements into scalable technical solutions.

TECHNICAL SKILLS

- SaaS Implementation & Configuration
- SQL Querying & Data Validation
- JavaScript, HTML, CSS, Laravel
- REST API, SOAP API, Postman
- Workflow Automation & System Integrations
- Troubleshooting & Technical Support (Tier 1–3)
- CRM & SaaS Platforms (Salesforce, Zendesk, Zuora, Kustomer, Gladly and Applied Epic)
- Data Analysis & Reporting (SQL, Databricks, Datadog)
- QA Testing & Deployment Support
- Jira, Confluence, Slack, Trello, Git, Bitbucket

WORK EXPERIENCE

Laivly, Inc.

Senior AI and Integration Specialist

May 2026 - Present

Cyberpark Tower, Quezon City - Remote

- Built and deployed AI-powered agents and automation solutions to support business operations and client requirements.
- Developed, tested, and optimized prompts to improve AI response quality, accuracy, and workflow efficiency.
- Collaborated with Technical Solutions Managers, AI/Automation leads, developers, architects, QA, support teams, and business stakeholders to deliver scalable AI-driven solutions.
- Implemented and managed AI technologies including LLMs, AI agents, low-code platforms, and software integrations.
- Integrated automation workflows with enterprise platforms such as CRM, ERP, and communication systems to enable seamless end-to-end functionality.
- Troubleshoot technical and automation issues in real time, ensuring high system reliability and minimal operational downtime.
- Identified opportunities for process optimization, product enhancement, and workflow improvements to increase operational efficiency.
- Monitored automation activities, project timelines, and system performance, proactively escalating critical risks and blockers when needed.
- Provided advanced configuration support, validation, testing, and go-live assistance for automation and AI initiatives.
- Conducted code reviews and ensured adherence to development standards and business review requirements.
- Partnered with cross-functional teams to identify bugs, implement fixes, and maintain solution stability and scalability.

- Stayed current with emerging AI technologies, automation capabilities, and platform enhancements to drive innovation and continuous improvement.
- Managed multiple projects simultaneously while delivering high-quality results within tight deadlines.
- Contributed strategic ideas and recommendations that influenced future AI and automation development initiatives.

Senior Support and Configuration Specialist

October 2025 – May 2026
Cyberpark Tower, Quezon City - Remote

- Handle Tier 1, Tier 2, and Tier 3 technical support cases via Zendesk, ensuring timely and accurate troubleshooting.
- Investigate and resolve issues related to workflow logic, automation, and configuration.
- Partner with Engineering, DevOps, QA, and Solutions teams to escalate complex technical concerns.
- Update and refine configuration setups to support evolving client needs.
- Document case resolutions, troubleshooting steps, and configuration changes to enrich team knowledge.
- Identify recurring issues and propose improvements to enhance platform performance and client experience.

Implementation Specialist

October 2023 – October 2025
Cyberpark Tower, Quezon City - Remote

- Partnered with customer solutions teams to understand requirements, workflows, and automation needs.
- Planned and configured Agent Assistant using proprietary SaaS configuration management tools.
- Coordinated with DevOps teams for user access setup and reporting alignment.
- Executed configuration changes to match evolving client requirements.
- Provided regular project updates to stakeholders and highlighted critical issues.
- Ensured accuracy and quality of all client setups and configuration structures.
- Supported clients through validation, testing, go-live stages, and system handovers.

Accenture, Inc.

Application Development Analyst

May 2022 – September 2023
Taguig, Uptown Bonifacio Tower 3

- Built, configured, and tested packaged software and SaaS products.
- Provided deployment support for application releases, including planning and scheduling.
- Wrote and optimized SQL queries for data extraction, manipulation, and reporting.
- Participated in code reviews, QA activities, and system integration validations.
- Documented technical designs, configurations, and customizations for future reference and knowledge sharing.
- Collaborated with cross-functional teams to define technical specifications.
- Designed and developed solutions on the Zuora platform, including workflows, automation, and integrations.
- Troubleshoot issues related to Zuora configurations, workflows, and integrations.

Pixzel Digital

Junior Web Developer

March 2021 – October 2021
Iligan City

- Utilized PHP, JavaScript, Laravel, and other web technologies for system improvements and code fixes.
- Integrated data from various backend services and databases.
- Created and maintained system documentation.
- Conducted software testing to ensure quality and readiness for deployment.
